

To aid in the prevention of prescription drug abuse and diversion

FREE Professional Educational Programs Presented by Experienced Former Officers

The Purdue Pharma Law Enforcement Liaison and Education Unit, which is staffed by retired law enforcement officials, provides FREE educational materials, as well as drug identification cards and placebos for “reverse-sting” undercover operations.

Training – Topics include preventing and investigating prescription drug diversion; scams against physicians; pharmacy scams; investigating criminal prescribers; and pain topics and definitions related to the use of opioids for the treatment of pain.

Placebos – Identical to real controlled substances manufactured by Purdue Pharma, but contain no controlled substances. Their use is restricted to criminal investigations.

Educational Materials – Drug ID cards with full-color, actual-size photographs of the most commonly abused prescription drugs, according to the National Association of Drug Diversion Investigators. Educational brochures on preventing prescription drug abuse for law enforcement officers to distribute to pharmacies, physicians, and hospitals, which include how to spot and deal with scammers.

Anti-Crime Program – RxPATROL[®] (Rx Pattern Analysis Tracking Robberies and Other Losses) is designed to assist law enforcement efforts to apprehend and prosecute pharmacy robbers and scammers, as well as to help protect pharmacies. Using a Web-based program, RxPATROL collects, collates, and analyzes information from pharmacy theft reports across the U.S. The RxPATROL Web site—www.rxpathrol.org—has links to the National Association of Drug Diversion Investigators and to the National Community Pharmacists’ Association.

All of these programs are provided at no cost. We do not promote any company’s products. Our sole objective is to provide information that supports law enforcement to help keep prescription drugs out of the hands of criminals in order to ensure that these drugs are available for patients with real medical needs.
